## DATA SCRAPING

A technique in which a computer program extracts data from output generated from another program. Data scraping is commonly manifest in web scraping, the process of using an application to extract valuable information from a website.

### Tools

Puppeteer

Scrapy.org

### **Other Tools**

Mozenda.

Webhose.io

## **Google Dorks & Advanced search queries**

Google Dorks are advanced search techniques that use specialized operators to find specific and often hidden information on the internet.

### **Tools**

Google Hacking Database

Dorkbot

### **Other Tools**

## **Geolocation & IP tracing**

Cyberattacks can often be traced by IP address origin, which can be critical to identifying and mitigating security threats. Organizations use IP-based geolocation to detect and prevent unusual access to their networks

Kismet

## **Social Engineering Information gathering**

Social engineering is the tactic of manipulating, influencing, or deceiving a victim in order to gain control over a computer system, or to steal personal and financial information. It uses psychological manipulation to trick users into making security mistakes or giving away sensitive information.

## **Tools**

Baiting

Tailgating
